This revision to the San Luis Obispo County Amateur Radio Emergency Service Standard Operating Procedure (SOP) is dated March, 1995 and supersedes the undated original and previous editions of this SOP. This SOP has been prepared under the direction of the San Luis Obispo County Amateur Radio Emergency Service Council. The use of this SOP is for the use of local areas and is not to be used for any other purpose.

FORWARD

This revision to the San Luis Obispo County Amateur Radio Emergency Service Standard Operating Procedures (SOP) is dated March, 1995 and supersedes the undated original and previous updates.

This SOP has been prepared under direction of the San Luis Obispo County ARES and the San Luis Obispo County Emergency Communications Council (SLO_ECC). This SOP is for the use of local ARES members and does not supersede or replace any published ARRL or ARES procedures.

* - The Inter-Agency Contact List and the Membership List contain several pages. These lists are published in a format different from the remainder of the SOP and are inserted into the final document. These lists are indexed by their front sheets. If indexing is needed by the reader, please refer to the individual listing sheets by Page 14 - (listing page number) or 15 - (listing page number).

SECTION 1 - INTRODUCTION

1.01 AMATEUR RADIO AND ITS PLACE IN EMERGENCIES

Amateur Radio is established by Congress through the Communications Act as a service. Amateurs have been instrumental in the development of the communications art since the early work of Hertz and Marconi, who were essentially amateurs.

In the years just before World War I, a group of amateurs in Hartford, Connecticut established the American Radio Relay League (ARRL). The primary objective of this organization was to develop the art of communications through the establishment of a series of relay stations to expedite the transmission of public service messages across the country and to foster the experimentation which ultimately lead to the transcontinental and world wide communications systems.

Since these early days, amateurs have established a reputation for public service communications, especially in times of crisis and special need which can not be met by the regular communications systems. In the beginning, these services were rendered spontaneously and largely on an individual basis. As time progressed, the need for and value of organization became apparent and this lead to the establishment of several organized bodies with clearly defined functions.

Today, there exists in Amateur Radio a very complete and tight volunteer organization of amateur radio operators dedicated to public service. Sponsored by the ARRL, a field organization has been established which includes the Amateur Radio Emergency Service (ARES) and the National Traffic System (NTS). An independently organized system sponsored by the Federal Government called the Radio Amateur Civil Emergency Service (RACES) fulfills other functions not directly addressed by ARES and together they form integral parts of the Amateur Radio Service's Public Service effort.

1.02 THE AMATEUR RADIO EMERGENCY SERVICE (ARES)

ARES, which is administered by the American Radio Relay League (ARRL), consists of licensed radio amateurs who have voluntarily registered their qualifications and equipment for communications duty in the public service when disaster strikes. Every licensed radio amateur, irrespective of other affiliations, is eligible for membership in ARES. The only qualification, other than holding a valid Radio Amateur Operators License, is a sincere desire to serve the public interest. ARES is essentially a local operation within the County and is self regulating and self managed.

The amateur radio operators have equipment suitable for emergency operations and many have expended substantial sums of money in state of the art electronic equipment and emergency power supplies.

ARES provides back-up communications in the event of disasters or emergencies when regular communications are

disrupted or overloaded. The primary responsibility of ARES is to provide health and welfare communications.

ARES conducts regular training classes and exercises to insure that its members are well trained in emergency procedures and the best use is made of their individual talents. These exercises are planned and carried out so that any future emergency operations will function smoothly and effectively. These training exercises often take place in concert with regular public activities such as foot races and bicycle races. ARES provides communications to facilitate smooth running of these events. Such exercises and procedures allow the ARES response to a crisis to be flexible and effective.

1.02.01 AMATEUR RADIO RELAY LEAGUE (ARRL) FIELD ORGANIZATION

ARES is an integral part of the American Radio Relay League Field Organization. The ARRL has fifteen geographical Divisions with each Division having three to seven Sections. Each Section has numerous Districts. Our portion of ARES is in the San Luis Obispo District of the Santa Barbara Section of the Southwestern Division. Within our District we have five Areas.

Each of the Sections has an elected Section Manager who administers activities within their Section. The Section Managers make Section Appointees to supervise various individual activities including ARES and the National Traffic System (NTS).

Each District has an ARES District Emergency Coordinator (DEC). Each Area has an Emergency Coordinator (EC) with some Areas also having an Assistant Emergency Coordinator (AEC).

It is suggested that each ARES member familiarize themselves with the ARRL Field Organization. ARRL publications describing the ARRL Field Organization are included with this SOP by reference.

1.03 THE RADIO AMATEUR CIVIL EMERGENCY SERVICE (RACES)

RACES differs from ARES in one very important respect - it is a federally regulated activity within the Amateur Radio Service. It is administered by the Federal Emergency Management Agency of the United States Government and is intended to provide radio communications during periods of local, regional, or national civil emergencies for civil preparedness purposes, only. These emergencies can include natural disasters such as fires, floods, or earthquakes, etc.. As defined by the rules, RACES is a radio communications service conducted by volunteer licensed amateurs. The service is designed to provide emergency communications to state or local civil preparedness agencies. As

such, it can only operate at the specific request of a designated state or local official.

The main advantages of RACES are that the participants are covered by government insurance programs during their active roles and some federal funds are available to assist in the development of the program. The only disadvantage is some lack of flexibility and restrictions imposed by the Government.

SECTION 2 - BACKGROUND AND ORGANIZATION OF THE SAN LUIS OBISPO COUNTY EMERGENCY COMMUNICATIONS COUNCIL (SLO_ECC)

2.01 BACKGROUND

ARES, and to a lesser extent, RACES, have been active in San Luis Obispo County for many years. Additionally, several smaller organizations sponsored by local amateur radio clubs and special interest groups have also been active. However, as the County grew, it became apparent that some central coordinating body would be of great benefit to the community and to many local organizations.

The need for a centralized emergency communications effort was recognized by the County several years ago, largely due to the commissioning of the nuclear power facility at Diablo Canyon. Part of the commissioning effort, as required by the Nuclear Regulatory Commission, included the establishment of an Emergency Operations Center (EOC). With the aid of Pacific Gas and Electric Company, such a facility was constructed and the facility was integrated with the Sheriff's Department. This facility not only includes the Emergency Service provided by the County (911) and the Emergency Control Station for Diablo Canyon, but also includes a well equipped amateur radio station. This amateur radio station has been largely funded by monies and equipment donated by radio amateurs and amateur organizations. The EOC has at its disposal a mobile communications facility installed in a bus which was also donated.

In order to coordinate all the various efforts and to take advantage of a combined and coordinated effort between ARES and RACES, it was decided in 1990 to form the San Luis Obispo County Emergency Communications Council (SLO_ECC) with express intent of accomplishing the following:

- A. Coordinate the emergency communications efforts of the County Communications Department, ARES, and RACES.
- B. Coordinate and establish working agreements with other organizations in the County as deemed desirable.
- C. Establish committees as considered necessary.

2.02 ORGANIZATION

2.02.01 BOARD OF DIRECTORS

In order to accomplish the goals set for SLO_ECC, a Board of Directors has been established. This board meets monthly and is

empowered to establish and develop procedures for the current and future operation of SLO_ECC. The Board is comprised of the following officers elected annually by the membership (See also Appendix A):

- President
- Vice-President
- Secretary
- Treasurer
- Three At-Large Directors

2.02.02 COMMITTEES

The Board of Directors has established the following committees (See also Appendix A):

Inter-Agency Coordination - Charged with the responsibility for concluding necessary agreements, letters of understanding, or other arrangements with the various agencies set out in this Plan.

Technical - Charged with the responsibility for developing and maintaining the technical needs of SLO ECC.

Planning/Training - Charged with the responsibility for developing and maintaining any plans as the Board of Directors may deem necessary. This committee is also responsible for the development and coordination of training and training exercises.

Each committee is responsible to the Board of Directors. Each committee is responsible for enlisting the aid of members as necessary to accomplish the assigned tasks. Very close cooperation between these committees is necessary at all times to prevent the overlap and duplication of effort. Each committee is required to be represented at each Board of Directors meeting. The committees do not have a vote in any proceedings of the Board.

2.02.03 DUES

Membership contributions to the San Luis Obispo County Emergency Communication Council has been set at \$10.00 (ten dollars) per annum to help with administration costs.

2.02.04 NEWSLETTER

The Board of Directors has authorized the publication of a monthly Newsletter for the reporting of the following to the SLO ECC membership: Board of Director activities, Committee activities, meeting schedules, training schedules, articles of general interest. The Board has directed that the Newsletter be distributed to all SLO_ECC members and organizations interested in SLO_ECC activities.

2.02.05 ORGANIZATIONAL CHART

The current Organization of the San Luis Obispo County Emergency Communications Council is shown on Appendix A.

SECTION 3 - THE ARES NETWORK

3.01 ELEMENTS OF THE ARES NETWORK

The local ARES Network is comprised of the following elements:

- A. A network of VHF/UHF repeaters.
See Appendix E.
- B. A network of VHF Digipeaters and a Bulletin Board.
See Appendix E.
- C. Assigned VHF and UHF frequencies.
See Appendix F.
- D. Numerous Emergency Communications Centers and Emergency Operations Centers.
See Appendix G.
- E. Assigned District Emergency Coordinators (DEC), Area Emergency Coordinators (EC) assigned Assistant Emergency Coordinators (AEC).
See Appendix A.
- F. High frequency facilities permanently installed at key points and backed by amateur stations throughout the County. These facilities are capable of intercontinental communications and interface with the National Traffic System (NTS) on 3.952 Mhz 0100z-0730z, daily.
- G. A nucleus of trained operators.
See Appendix D.

3.02 ACTIVATION OF THE ARES NETWORK

Any event which disables or severely overloads the telephone system is an emergency which calls for activation of the ARES Network. Such an emergency will usually be self-evident or will be indicated by the Emergency Broadcast System. In this case, ARES members will check in on one of the two Primary Emergency Frequencies (See Appendix E) and, if able, proceed to their assigned locations. Government officials from local or state agencies who need to activate the ARES system should refer to Appendix B. In the event the telephone system is not operating, these key volunteers should be contacted via the emergency radio frequency from the County Emergency Operations Center, the California Division of Forestry Command Post, or the Cal-Trans amateur radio facility in San Luis Obispo.

Not all emergencies will affect the telephone system. In this case, the ARES members may be alerted using the Telephone Tree / Notification List shown in Appendix B.

Notice of an EMERGENCY (declared by a responsible official), an ALERT (notification of a possible emergency), or a request for aid from some other area should activate the ARES Network. Any member of the Network receiving notice, if not a DEC, a EC, or a AEC should contact a DEC, EC or AEC and pass on the received information. If the individual is unable to reach a responsible party, the individual should act as Net Control on the Emergency Frequency until relieved of their duties.

The DEC, any EC, or any AEC may, even without being officially notified, activate the ARES Network if there is a reasonable presumption of need.

3.03 NET CONTROL

The individual activating the Network becomes the Net Control for the Emergency Net, unless and until they pass on the responsibility. The Net Control will evaluate the situation and decide how much of the organization should be alerted, what liaison with neighboring cities and organizations (See Appendix C) should be established, what locations should be manned and what other response is needed. They should also decide whether to alert by voice radio, packet radio, telephone, or a combination.

Depending upon the circumstances, the Net Control may opt to use tactical or formal message procedures. Copies of all messages shall be retained.

The Net Control and any stations the Net Control may designate shall keep a log of the emergency operations which shows at least the following: starting and ending time of messages, summary of important messages, summary of important events and actions.

3.04 REPORTING

The DEC shall submit a report on Form CD-157 for all emergency and simulated emergency operations as soon as possible after the event, based upon logs and recollections of the various participants. This report is described in the Emergency Coordinator's Manual which is included with this SOP by reference.

3.05 ARES TRAINING NET

Each Tuesday evening at 7:30 pm local time there is an ARES Training Net on an ARES repeater. All ARES members and guests are encouraged to participate. A copy of the Net Control Procedure is shown on Appendix I.

SECTION 4 - PERSONAL PREPAREDNESS

All ARES members are encouraged to keep and maintain a personal preparedness kit so that they can be available with the minimum of delay and be able to maintain themselves for a reasonable period of time in the event their services are needed. The following is a recommended minimum kit:

Clothing - Spare jeans, 2 shirts, 2 pair of socks, 2 changes of underwear, spare pair of shoes.

Toilet articles - shaver, toothbrush and toothpaste, wash cloth, soap, shampoo, talcum powder, cotton swabs, facial tissue, paper towels, toilet paper.

Stationary - Calendar/Diary, calculator, ball point pens, pencils, note pad, ARRL message forms, County map, phone book.

Miscellaneous - Flash light, am/fm radio, travel alarm clock, spare batteries, work gloves, personal medications, money (\$20 bill and loose change), basic tool kit, blanket or rug.

Food - Gallon of distilled water, chocolate, snacks (sealed), plastic cups.

For Mobile Operations - Hard hat, tire pump, reflective vest, tool box, fire extinguisher, waterless hand cleaner.

Radio Equipment - Copy of your license. It is suggested that portable outside antennas be included with your equipment. And, don't forget your spare HT batteries and chargers.

APPENDIX I
ARES WEEKLY TRAINING NET
NET CONTROL PROCEDURES

Held at 7:30 pm each Tuesday on the Mt. Lowe Repeater (146.865)

QST, QST, QST

All ARES / RACES Members and guests.

This is (Your Call and Name), Net Control for the San Luis Obispo County Amateur Radio Emergency Service Net, operating from (Your Location).

This Net meets every Tuesday evening at 19:30 hours local time on 146.865. Our ARES/RACES repeaters operate from Mount Lowe, located east of Highway 101 on Cuesta ridge. Our UHF repeater is on 443.425. Both repeaters use a PL tone of 127.3 hz.

The purpose of this Net is to provide a weekly test of emergency communications equipment, exchange information relating to emergency readiness, and to provide training in emergency procedures.

This a directed net. To beak in or relay, please give your call. Otherwise, please do not transmit unless requested to do so by the Net Control.

Are there any stations with formal written traffic?

Are there any contacts or QSTs to be listed?

Each staffed Emergency Communications Center will check-in first followed by individual check-ins from its' surrounding area.

ECC-1 County Emergency Operations Center
ECC-9 Red Cross Headquarters
ECC-10 CDF/County Fire
ECC-16 Cal-Poly
Central Section, San Luis Obispo individual check-ins

ECC-2 Arroyo Grande
South County, Five Cities Area individual check-ins

ECC-3 Atascadero
ECC-6 Paso Robles
North County, Santa Margarita, Atascadero, Paso Robles, Templeton, & north individual check-ins

ECC-12 Cambria CDF
North Coast, Cambria, San Simeon, & north individual check-ins

ECC-5 Morro Bay
ECC-11 South Bay Fire
Estero Bay, Morro bay, Los Osos, Baywood Park, Cayucos individual check-ins

We cordially invite all visitors interested in Amateur Radio Emergency Service to check-in. Please give your call, name, and QTH, now.

ARES meetings are held the fourth Wednesday of each month at the CDF Training Center on old Camp San Luis Obispo.

Stations with QSTs and contacts can proceed at this time in order of listing.

Is there any further business, questions, or comments regarding ARES/RACES operations?

The San Luis Obispo County ARES Net is now officially closed at _____ hours. This is (call sign) thanking you for your participation. I will stand by for anyone desiring further information on ARES (your call).

Emergency Readiness Drills may involve the following categories:

- Mobile stations

- Base Stations with emergency power

- Stations with packet capability

- Stations with UHF capability

- Stations with emergency response kits able to depart in 30 minutes
